After speaking with BSEE's POC about the request she explained that local BSEE employees and representatives from Washington D.C. are having a meeting in Santa Barbara today for an unrelated reason and wanted a better perspective of the geology of the area and the distance in relation to Line 901 and the platforms offshore.

>

> After speaking to LT. Schmid, Safety Officer, Ops Section Chief, Public Information Officer and Liaison Officer, we determined that accommodating their request in Section 1 would slowdown progress in the area and recommend that we could provide them the same information in the Command Post. PowerPoint presentation are available here about the incident and we already have volunteers ready to discuss any issues they may have.
